DETAILED ACTION

Response to Remarks

1. The Office Action has been made issued in response to amendment filed July 10, 2008. Claims 1-11 are pending.

Claim Rejections – 35 USC section § 102 & 103

Applicant arguments are moot in view of the new grounds of rejection.

Claim Objections

2. Claims 1-11 are objected to because of the following informalities: Claims 1 and 5 recite the limitations H, S, V and H, L, S, X, Y and Gx and Gy. However, it is unclear as to the meaning of these limitations. Appropriate correction is required.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-11 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory “process” under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing (Reference the May

Art Unit: 2624

15, 2008 memorandum issued by Deputy Commissioner for Patent Examining Policy, John J. Love, titled "Clarification of 'Processes' under 35 U.S.C. 101"). The instant claims neither transform underlying subject matter nor positively tie to another statutory category that accomplishes the claimed method steps, and therefore do not qualify as a statutory process.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 5 recite the limitation H, S, V and H, L, S, X, Y and Gx and Gy.

However, it is unclear as to the meaning of these limitations.
